

Mobiles that Work on **Park and Play** Technology

In the last few years Mobile LED screens have become very popular with event planners. What normally takes many hours to set up with large crews can now be set up by one person in less than a half hour

Screen can be seen from a long distance away and more importantly at a close viewing range

- Screen comes assembled and pre wired in the trailer, minimizing installation costs
- Screen can be moved to multiple locations during the day if required
- Only one tech needed for setup
- Audio playback/ sound reinforcement (800 watts)
- On board Generator
- Can be run on shore power
- Trim height of 8.5 ft. is exceptional
- Screens rotate a full 360 degrees on its mast to accommodate multiple viewing positions
- LED Processor accepts composite , component, SDI, and RGB (computer) signals
